

Amendments to the Specification

Please amend the specification as indicated below.

Page 6, after line 21 and before line 22, add the following new paragraph:

More specifically, as shown in FIG. 1, the aforementioned predetermined angle θ is a positive angle such that a leading edge of the chord 11 at the front end of the duct 1 is separated a greater distance from the duct axis 12 than a trailing edge of the chord 11 at the rear end of the duct 1.
